

SONGS FOR THE MC16

SONGS FOR THE MC16

TO PLAY THE SONGS ON A DISK

“Boot up” the disk in the usual fashion. (On an Apple IIe, press RESET while holding down the CONTROL and open-Apple keys—on any other Apple turn the system off, then on. Insert the disk in the drive with the “in use” light on.)

The first time you use **each disk**, you *must* select option 1 from the menu (RECONFIGURE PLAY PROGRAM). After you answer questions about your particular system set-up, the PLAY program will be configured properly (the disk must not be write protected). You must also use option 1 for each disk the first time you use it after changing your system set-up (for example, after you move your Music Card to another slot).

To play all songs, select option 2 (PLAY ALL SONGS). After the songs have been played, the menu will be presented again. You can use option 2 to play the songs again, or you can insert another one of the song disks and use option 2 to play those songs (or, if necessary as just described, use option 1 first to configure the disk).

Some songs may not be played back with option 2, because they play forever or have other features which make them more suited to individual playback than for playback with the ALL SONGS option. These can be played using the following method:

PLAYING INDIVIDUAL SONGS

After “booting” the disk (as above), and configuring with option 1 if required, select option 3 (RUN PLAY PROGRAM). When the ● prompt appears, you may type CATALOG (return) if you wish to get a list of songs. (The listing may stop when the screen is full. If the ● prompt has not reappeared yet, press SPACE to see the remaining titles.) Titles beginning with M: can be played. For example, to play a song which appears as M:MARCH IN D, you should type PLAY:MARCH IN D (return).

When finished playing individual songs, either reboot or type FP (return) RUN HELLO (return) to go back to the menu.

USING THE "ALBUM" FILES

Each disk contains an "album" file which lists the names of the songs on the disk (for a complete description of album files, see the DISCO section of your Music Card manual). The DISCO program can be used if you desire to play the songs in a random order. A copy of DISCO is provided on disk 1 (due to disk capacity limitations, it is not provided on the other disks).

Unless the disk supplied with your MC16 is version C (13-3-1C), you must not use the copy of DISCO provided with the card. Use the DISCO program on Disk 1 of this package instead.

To make the menu appear after the album has been played, the album files on these disks have been specially altered. After the usual STOP command, FP and RUN HELLO commands have been added. If you make any changes to the album files on these disks, you may wish to run the program ALTER ALBUM (found on disk 1) afterward to restore these commands. If you run ALTER ALBUM, it will print "EXTRA IGNORED" several times—this is normal (Applesoft doesn't like :s very much).

DOS 3.3 WITH "FAST-LOAD"

These disks have the DOS 3.3 (16-sector) operating system, modified with ALF's "FAST-LOAD". When you "boot" one of these disks, the FAST-LOAD DOS 3.3 is used so songs can be loaded into memory (for playback) faster. However, if you try to INIT a disk with the FAST-LOAD DOS 3.3, the message "I/O ERROR" will appear. If you wish to INIT a disk, you must first boot a normal DOS 3.3 disk.

MAKING BACK-UP COPIES

These disks are not copy-protected. You can make back-up copies using ALF's "Total Accuracy" Copy Program. (Or, if need be, with the copy program Apple supplies on the DOS 3.3 master disk.) U.S. Federal law (Title 17, Section 117) allows the purchaser of copyrighted computer programs to make back-up copies for archival purposes only. All such copies must be labeled with the original copyright notice(s), and all copies must be destroyed or given to the new owner if the programs are sold.

Making back-up copies of the songs on these disks is illegal under Federal law (sections 501 and 506). However, ALF grants a non-exclusive license to the original purchaser of these disks to make back-up copies provided: (1) such back-up copies are labeled with the copyright notices found on the original disk, (2) the purchaser's name is written on all copyright notice labels, (3) no more than two back-up copies of each disk exist at any time, (4) such copies are kept in storage and used only to replace a damaged disk, and (5) all such copies are destroyed if the purchaser ever sells or otherwise transfers ownership of this product.

Duplication of these disks, other than back-up copies as described above, in any form and for any purpose, is illegal under Federal law. The sound produced by the Music Cards while playing these songs is copyrighted and may not be recorded. Unauthorized public performance, broadcast, distribution, rental, lease, or lending prohibited.

IF YOU HAVE ONLY 1 MC16 CARD

The songs on Disk 1 require only one MC16 card for playback. (The "Generic Xmas" songs on Disk 1 require two MC16's. These songs are not included in the Album file, so when using one MC16 you can still use option 2, PLAY ALL SONGS.) The songs on Disk 2 through Disk 5 can be played with two MC16 cards, or with three cards.

IF YOU HAVE FEWER THAN 3 MC16 CARDS

Three MC16 cards are required to play SONGS FOR THE MC16, PART 2. If you have fewer than three MC16 cards, you should obtain SONGS FOR THE MC16, PART 1.

SONGS FOR THE MC16

PART 1 (13-3-37)

PART 1, DISK 1

Two Part Invention in A Major (#12)

by J. S. Bach

Greg Bloom & Phil Tubb

2 Parts 1:07
