

Professional Graphics Library

Pre-drawn graphics for use with ROBOSYSTEMS

The ROBO Professional Graphics Library contains pre-drawn material for many drawing applications including engineering schematics and graphics for business and education. All the library elements were produced using the ROBOSYSTEM for the Apple II computer. They can be used with all levels of ROBOSYSTEM graphics and drafting software.

ROBO pre-drawn library elements are a great time saver. Carefully drafted to a uniformly high standard, they can be instantly changed in size, orientation, compression, colour, and line type. They can also be personalised to your exact requirements.

The ROBO library gives you all the advantages of dry-transfer lettering systems, without their one great drawback ... because each library element can be used an unlimited number of times, you will never find yourself out of a crucial letter or symbol.

Each library disk comes with a pictorial catalogue of contents and, where necessary, instructions for use.

Futura Alphabet

A modern sans serif alphabet drawn in outline. The characters can be set at any size, rotation, compression and colour.

Order as LIB221

City Medium Alphabet

A modern serif alphabet in both outline and solid. The characters can be set at any size, rotation, compression and colour.

Order as LIB222

Helvetica Bold Alphabet

A modern sans serif alphabet drawn in outline. The characters can be set at any size, rotation, compression and colour.

Order as LIB223

Analog Schematic Symbols

Analog schematic symbols in general use in the U.K. and Europe. Includes transformers, relay contact sets and multi-way switches.

Order as LIB226

Digital Schematic Symbols

Logic symbols in general use in the U.K. and Europe. Includes I.C. package outlines and logic symbols.

Order as LIB227

Printed Circuit Board Artwork

A complete, easy-to-use system for preparing prototype P.C.B. artwork and silk-screen artwork for component references and solder-resist masks.

Order as LIB228

Fluid Power Schematic Symbols

Symbols to ISO/BS 2917 and CETOP standards. Includes modules for easy assembly of any required valve/actuator combinations, common cylinders, regulators, etc. and selected fluid logic symbols.

Order as LIB230

Chemical Engineering Process Symbols

172 common symbols from BS1553/974, ASA and other sources. Includes vessels, condensers, heat exchangers, valves, instruments and piping.

Order as LIB231

Chart Aids (2 Disks)

A large selection of symbols for added sparkle and impact in business and classroom presentations. The accompanying guide illustrates many new ideas for memorable, exciting graphics.

Order as LIB245/6

ROBO Library Packs

Each pack contains 5 disks with guide books and offers an easy and cost effective way of getting started.

Technical Library Pack

Contains Library disks 226, 227, 228, 230 & 231

Order as LIBTECH1

Presenter Library Pack

Contains Library disks 221, 222, 223, 245 & 246

Order as LIBPRES1
