EDUCATIONAL

COMPU-MATH

This growing Edu-ware instructional series consists of systems unlike anything that have ever before been available for the personal computer. Going beyond the familiar "drill and test" formats, these packages are designed to teach NEW skills, and remediate deficiencies in old ones.

Each Compu-Math package begins with a diagnostic Pre-Test, which recommends an appropriate Learning Unit to the user. The Learning Units begin by specifying instructional objectives, proceed to teach to these specific goals using shaping and cueing methods, and finish by testing to verify acquisition of the intended skills.

Highly animated and graphic displays hold the learner's attention and increase comprehension. Ease of operation allows young learners to work unassisted. Additionally, the patience of the Apple, and randomly generated practice exercises enable each learner to work at his own pace. Compu-Math has been specifically designed for use in both home and classroom environments.

48K and disk drive required.

FRACTIONS (ver 2.0)

A Pre-Test and Six Learning Units:
Definitions, Common and Lowest Denominators, Addition, Subtraction, Multiplication, Division. Each includes the use of both common fractions and mixed numbers. 39.95

DECIMALS (NEW!!)

A Pre-Test and seven Learning Units:
Conversion, Addition, Subtraction, Rounding Off, Multiplication, Division, Percentage. 39.95

METRI-VERT

As today's society converts to the metric system, this program makes the transition easy. Elegant menu-driven routines compute conversions for length/distance, area, volume, weight and temperature. Also includes a "display page" which stores the result of up to 20 calculations for easier use.

32K, cassette 9.95, diskette 15.95

EDU-PAK I

Edu-ware's original educational package contains three sets of skill-enhancing and utility programs:

COMPU-READ (version 2.1)

For those tired of fighting the paper jungle, four independent programs (and two file building routines) help you rapidly increase comprehension and retention. In each you set the initial difficulty level, and the computer matches itself to your performance. The four programs are: Character Recognition; High-speed word Recognition, Synonyms and Antonyms; Sentence Comprehension.

PERCEPTION

Three separate programs which challenge and improve your visual skills. I--Match Hi-res lines drawn by the computer, with your own controlled by the paddle. (Game control paddles required.) II--test your powers of observation with a World War II test for spy candidates. A narrow mask travels over a random figure, showing you only small glimpses at a time. (48 Difficulty levels in all). III--your visual memory must distinguish sizes of identical shapes. You control the shape, display time and presentation format. (Perception I requires ROM Applesoft).

STATISTICS (version 2.0)

Provides the ability to carry on many of the statistical calculations ordinarily found in FORTRAN driven SPSS programs, including: mean, variance, standard deviation, Pearson correlation, normal distribution, probability and frequency, Chi-square distribution, Chi-square test, T-test.

Compu-Read	48K	disk only	24.95
Perception Package	48K	disk only	19.95
Statistics	32K, cassette	9.95, disk	15.95
Edu-Pak I: all 3 on one diskette			39.95

STORY-TELLER

This English grammar aid re-enforces proper usage without discouraging language exploration as it turns user into author. More than just a "mad-libs" game, it includes instructional routines which describe and exemplify all major parts of speech. As these are mastered, randomness takes over generating humorous tale after tale.

cassette, 32K 14.95 diskette, 48K 19.95

All Edu-ware products are written in Applesoft II Basic.

Each is compatible with both Apple II and II-Plus computers.

Products which state "ROM Applesoft Required" demand that Apple II users have an Applesoft firmware or language card.

ENTERTAINMENT

TERRORIST

A frightening two-player game which puts you directly into the hot seat, managing a life and death struggle with ruthless terrorists. The paradoxes and pressures inherent in both sides of the struggle are brought to life as the Apple allows each to move against the other simultaneously.

Included are three interaction scenarios (capture of a building and hostages, air piracy, and nuclear blackmail) a parameter generator, a scoring routine, and an easy-to-use turn-key system which brings all of these programs together. Random and player-generated parameters generate that no two confrontations will be exactly the same, making this package a sobering and thought provoking experience for all. (The hijacking scenario game requires ROM Applesoft.)

48K, disk only 29.95

NETWORK

The thrill and frustration of being the head of Television Programming for a giant network is experienced by two players as they compete with each other and the computer. You bid on new shows, schedule them, adjust to weekly ratings, and then dump losers and try to recover from your mistakes at the end of the thirteen week "sweep". Paddle control provides real-time control over the rapidly changing situation.

48K, disk and paddles required: 19.95

SPACE

This classic epic game series provides a multi-faceted simulation of human life in an interstellar environment. Two different game packages represent some of the decisions which might be faced by a member of interstellar society. Play begins with the building of one or more "characters" who may enter any of the various scenario games on each of the diskettes. You are challenged not only to cope with the scenario itself, but also to learn (and improve on) the strengths and weaknesses of your characters:

SPACE

The original package contains the Characters game and five demanding scenarios which test your characters in various high-risk and high-benefit situations: First Blood, Defend, Explore, Trader and High Finance.

SPACE II

Contains Characters and two games which utilize your characters' skills in imaginative, non-economic scenarios: Psychodelia (gives clues to your character's makeup through experiences with mind-altering drugs... in a safe, computer environment) and Shaman (your character is launched on a long unpredictable career as a religious practitioner on an untamed planet).

48K, diskette only. SPACE 29.95

SPACE II 24.95

WINDFALL, The Oil Crisis Game

Have high energy prices and short supplies left you more time around your computer? Windfall will fill those empty hours (though not, unfortunately, your gas tank), and alleviate frustrations as your brain tangles with energy markets. As the Chief Executive of Engulf Oil you join the other side of the petro world, attempting to turn crisis into cash. Screen displays show both graphically and numerically the results of your manipulations, as a helpless public lines up at your stations.

32K, diskette 19.95 cassette 14.95

***** UTILITY *****

TEXT FILE EDITOR (for sequential text files)

This versatile editor can take the hassle out of working with sequential files, as well as make them do more for you. Editor can be used to create, combine or manipulate files using 3.1 or 3.2 releases of DOS. A 17-page manual contains instructional, reference and modification material, suiting both the lifeline programmer and the beginning disk-booter. Can also be used to unlock the secrets hidden in the files of Compu-Read, Zintar, Subliminal, Network, Terrorist and Space.

32K, disk 24.95

UNI-SOLVE, The Electronics Designer

Designed for the electronic hobbyist and engineer, this series of programs provides you with 24 major solution sets to problems encountered in engineering and design, at a fraction of the cost of any similar software. Equations include such diverse computations as transmission line formulae, reactance, coil-winding models and modulation percentages, as well as those required in everyday use. Clear and easy access is provided to each of the subroutines through a master menu. (Cassette version requires 48K and ROM Applesoft.)
