

# FingerPrint® GSi

Screen Dump Graphic Utility Card with Interrupt Button and Programmable Desktop Accessories for the Apple IIGS.

## Overview

The FingerPrint® GSi is a screen dump graphic utility card with special desk top accessories and graphic tools that allow the user to interrupt the Apple IIGS at any moment, even if the application does not allow interrupts or access to the desktop and control panel. At a touch of the FingerPrint® button, you gain access to the FingerPrint® GSi's desktop environment with pull down menu's which allow you to control printers, do screen dumps or activate any of the standard FingerPrint® GSi, or user definable, desktop accessories. Featuring an interrupt activator button, pull down menu's, save to disk and load from disk functions, slide-show software, graphic magic tools, a desktop containing calendar and calculator, and full printer control to manage the Apple IIGS's two serial ports or FingerPrint® compatible parallel interface with full control of fonts and printer commands, it provides the ideal utility for every Apple IIGS user wanting to get the most out of their printer and software.

## Applications

The FingerPrint® GSi is much more than a utility card. It can help you become more productive and more creative by providing you with total control over your Apple IIGS computer, printer and software. The only limits are those in your imagination.

## Features

- Push button screen dump interrupt captures and prints Text, Low-res, Hi-res, Double Hi-res, Super Hi-res and Mixed mode screen images in full color and B/W.
- Save captured screen images to disk. Where they can be reloaded into other applications as files or loaded back into memory using the FingerPrint button.
- Pull down menu's, provide instant access to the FingerPrint® GSi's desktop accessories, graphic tools, and printer manager.
- Desktop accessories provide a typewriter, calendar, calculator and many other features accessible at a touch of the FingerPrint® button.
- Controls any printer connected to the Apple IIGS serial ports or FingerPrint® compatible parallel interface.

### ➤ FIVE-YEAR WARRANTY!

Apple IIGS is a registered trademark of Apple Computer, Inc.. FingerPrint is a registered trademark of Precision Software, Inc..

## Benefits

- Capture and print screens from your favorite software without having to exit or "BREAK" the program independent of operating system or programming language.
- Export/Import captured screens to Print Shop, Fantavision, Newsroom and many other graphic publishing programs. Load images directly into graphic applications.
- Rotate, variable enlarge with zoom, crop with windows and rubber banding, inverse and reposition graphics. Set line length, margins, page numbering, page headers and change colors when printing, change fonts and sizes.
- Use your printer as a typewriter, check dates and calculate sums in the middle of other applications. Users can also write their own desktop accessories which can easily be included in the FingerPrint® GSi desktop.
- One card for all your printers. Perfect for users without printers. Capture data to disk and dump to printer later.
