FOUR LANGUAGE ARTS ACTIVITIES
AGES 5-10

SKILLS DEVELOPED

- Phonics
- Reading
- Rhyming
- Vocabulary
- Alphabetical Order
- Classification
- Discrimination
- Meaning in Context
- Tense

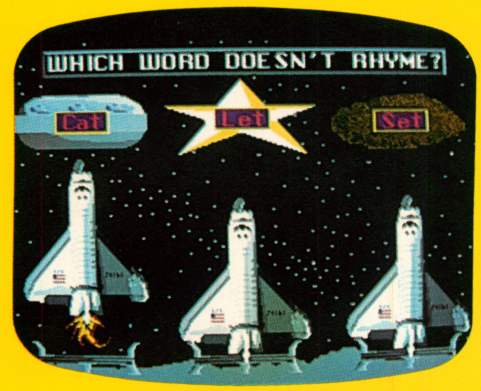
This exceptional program consists of a variety of learning activities that cover many of the fundamental language art skills. Children will delight in learning as they interact with the space creatures and earn the chance to make a wish on the happy star.

RHYMING ROCKETS - The objective of this module is to select which word doesn't rhyme with the other two. Young readers will use their knowledge of phonics to read and sound out the three and four letter words included in the data base of over 400 words. Children will be thrilled as their correct answers are rewarded when the rockets blast off!

ALPHA BLAST - Over 1000 first through third grade level words are included in the Alpha Blast data base. Children must arrange lists of ten words in alphabetical order before the space ship can take off. The level of difficulty may be predetermined.

FLYING SAUCER - Children are shown sentences with a missing word. They must choose the word that best completes the sentence, making sure the sentence is grammatically correct. This very comprehensive module includes 200 sentences on 2 difficulty levels that aim to develop classification, discrimination and meaning in context skills, as well as teaching vocabulary, knowledge of tense and contractions.

RHYMING CHALLENGE - This is a stimulating 1 or 2 player game for children of all ages as well as adults. The object is to make as many words as you can that rhyme with the word the computer selects. The friendly aliens will tell you if you're correct and will keep score.



Designed and developed by June Stark, Director and Teacher
The Computer Learning Center for Children.

Programming by Andrew Bagdanov and William Demas.
Graphics by Joseph Hewitt IV.
