Introducing the DataLink™ modem.  
Get instant access to networks and databases  
— plus network memberships and discounts worth \$177.95!

Now you can tap into a world of information — without draining your resources. Our DataLink™ modem lets your Apple IIGS, IIe or II+ communicate with other computers, download free software from networks and bulletin boards, access database services and more. For a remarkably low price.

### The world at your fingertips.

With the DataLink modem, you'll be able to draw information from thousands of databases. Send and receive electronic mail — even overseas. Join clubs and bulletin boards to exchange software or solve computing problems with other Apple users. Download free public domain software. And share files with personal computers and mainframes.

### There's nothing missing on DataLink.

Unlike the Smartmodem®, DataLink comes with its own easy-to-use communications software in ROM and on disk that supports macros, file transfers, on-line time display, data capture and datascopes mode. The software also allows you to store hundreds of phone numbers for auto dialing and log on.

Because DataLink is 100% Super Serial Card compatible, you can also run virtually all other communication software, including Point-to-Point, Apple Access and ASCII Express, to name a few.

The compact design allows DataLink to fit in any slot — including slots 1 and 2 of the IIGS with a cooling fan installed. DataLink operates at 1200 or 300 baud. Built-in diagnostics check for accuracy of data transmission, and DataLink lets you track the progress of calls either electronically or via an on-board speaker.

### Introductory offers from popular networks included.

When you purchase DataLink, you'll get a fee-waived membership to The Source worth \$49.95. \$60.00 worth of free on-line time from NewsNet. A free \$50.00 subscription to the Official Airline Guide. A free subscription to the GENie network worth \$18.00! And information on MCI Mail.
