

TIMEMASTER H.O.™

The smart way to put the time and date on your II+, IIe and IIGs. Only Timemaster H.O.™ packs all the features of all the competition into one affordable card and makes that card totally ProDOS, DOS 3.3, PASCAL and CP/M compatible. And Timemaster is far superior to any other card for AppleWorks.

If you're using or writing software for other clock cards, you're still covered. Because the H.O. will auto-

programs in machine code, DOS 3.3, ProDOS, BASIC, PASCAL and CP/M.

The free programs include a computerized appointment book, a DOS dating program, interrupt programs and over 30 other programs that others charge extra for - or don't even offer. And all routines are installed in the System Library for easy use. You'll never use the Date command again.

As a low-cost option, you can add true BSR remote control to the H.O.,

One simple command will turn on or off any appliance or light (lights can be brightened or dimmed, too). Use your Apple for security lighting, wakeup, and controlling your TV.

Features:

- The first clock that displays the date and time on the AppleWorks screen and database files
- Allows AppleWorks to time and date stamp all data files automatically
- Meets and surpasses all protocols as defined by Apple
- Totally ProDOS and DOS 3.3 compatible
- Time in hours, minutes, seconds and milliseconds
- 24 hour military format or 12 hour with AM/PM format
- Date with year, month, day of week and leap year (other clocks say they have the year, but they don't; it's just that ProDOS will calculate the year based on day of week and it only does this for 7 years)
- The easiest programming in BASIC
- Fully buffered data bus
- Eight software controlled interrupts so you can run two programs at once
- Digital I/O port for advanced applications
- Compatible with all of Apple's languages. Sample programs for machine code, Applesoft BASIC, CP/M and Pascal on 2 disks
- Timer lets you time any interval from 48 days long to the nearest millisecond
- Accuracy 0.00005%
- High quality P.C. board, gold-plated connector, all I.C.'s in high quality sockets
- Auto-recharging nickel-cadmium battery designed to last over 20 years
- 5 year warranty - parts and labor
- Proudly made in the U.S.A.

*All the features
of all the
competition
combined.*

matically emulate them. And the Timemaster adds 14 new commands to BASIC. The H.O. even comes complete with two disks full of sample

giving you remote control of up to 16 lights and appliances in your home or office. Our BSR X-10 sends its signals over regular 110 volt wiring, so your home is already wired. And the BSR is easy to program because it's controlled by firmware in ROM on the Timemaster H.O.

Timemaster H.O. is the first clock to display the date and time on the AppleWorks screen

THE TIMEMASTER II H.O.™

(H.O. for short)

All the features of all the competition
combined.

The TIMEMASTER II H.O.™

The TIMEMASTER II H.O., H.O. for short, has ALL the features of all the competition combined, including leap year, year (not just in PRO-DOS) month, date, day of week, hours, minutes, seconds and milliseconds. The H.O. is TOTALLY PRO-DOS, DOS 3.3, PASCAL and CP/M compatible. And yes, it works great with APPLEWORKS.

If you are using or writing software for other clock cards, no problem, the H.O. will automatically emulate the correct clock.

The H.O. works with ANY program that reads ANY* clock, and H.O. comes with two disks full of sample programs, including a computerized appointment book, a DOS dating program, interrupt programs, and over 30 others. We give the software others charge extra for, or simply don't have.

As a low cost option, you can add true BSR remote control to the H.O. giving you remote control of up to 16 lights and appliances in your home or office.

Is the TIMEMASTER II H.O. a simple, easy to use clock for beginners? Or a sophisticated high performance peripheral for the experienced? The answer is "YES". And when you think about it aren't those two products, the one you need now?

Call 214/492-2027, 8 AM to 11 PM, 7 days a week. MasterCard, Visa & C.O.D. welcome. No extra charge for credit cards.

Send check or money order to: APPLIED ENGINEERING, P.O. Box 798, Carrollton, TX 75006. Texas residents add 5% sales tax. Add \$10.00 if outside U.S.A.

APPLIED ENGINEERING

*Obviously, by ANY, we mean clock cards that are advertised and sold, not necessarily a clock card that your cousin Ralph built in his basement.

The first clock card to add time and date to AppleWorks™ screens and files.

Timemaster H.O. So many features it's become the world's best selling clock card.

It's the smart way to put the time and date on your Apple II® or II+®. Because only the Timemaster H.O. packs ALL the important features of all the competition *combined*, including leap year, year (not just in PRO-DOS), month, date, day of week, hours, minutes, seconds and milliseconds. It's totally PRO-DOS, DOS 3.3, PASCAL and CP/M compatible. And, of course, it works better than any other clock with AppleWorks.

With the Timemaster H.O. you're assured of reliable, trouble-free operation along with simple, built-in, one-command time setting, accuracy through leap years, and a firmware maintained interrupt setting.

If you're using or writing software for other clock cards, you're still covered. Because the H.O. will *automatically* emulate them. And only the Timemaster H.O. adds 15 new commands to BASIC. The H.O. even comes complete with two disks full of sample programs, including a computerized appointment book, a DOS dating program, interrupt programs, and over 30 programs that others charge you extra for — or don't even offer. As a low-cost option, you can add true BSR remote control to the H.O., giving you remote control of up to 16 lights and appliances in your home or office.

- Time in hours, minutes, seconds and milliseconds; date with year, month, day of week and leap year
- 24-hour military format or 12-hour AM/PM format
- Eight software controlled interrupts so you can run two programs at the same time (many examples included)
- Can be set precisely to the exact second
- Digital I/O port for advanced applications
- Allows AppleWorks to time and date stamp all data automatically
- Displays time and date on AppleWorks screens and files
- Five-year warranty
