3M

diskettes

3M diskettes. Reliability you can trust.

3M diskettes are designed for reliability. We set high standards for diskettes so you get the performance and data security you demand.

3M diskettes are made at 3M, beginning to end. From the manufacturing and mixing of the magnetic oxides, to the coating of the media, we manufacture quality into each diskette. That way, we have complete control over the entire manufacturing process. And you can have complete confidence in every diskette.

Diskettes are warranted to be free of defects in materials and workmanship.

Diskettes may look alike, but they don't all perform alike. The surface of 3M media is less abrasive than the industry

average. This low abrasivity means less head wear and fewer service calls.

In addition, 3M diskettes exceed the industry standard for durability... a standard so high it is equivalent to rewriting every track on the diskette once every hour for over 200 years.

3M diskettes come in this handy storage box of 10 for home or office use. Included are write-on labels for efficient identification of your stored information. And the portable storage box allows you easy transport of your important data to and from business, home, school, or club activities.

If it's worth remembering, it's worth 3M diskettes.

Important Notice: LIMITATION OF REMEDY. If this product is proved to be defective, the exclusive remedy available and 3M's and/or Seller's only obligation shall be, at 3M's or Seller's option, to replace such quantity of this product which is proved to be defective or to refund the purchase price paid for this product.

LIMITATION OF LIABILITIES. 3M and Seller shall not be liable for any damages, including incidental and/or consequential damages.
